

JITENDRA SAI RAJESH MOTEPALLI

Business Analyst | Data Analyst

Richardson, TX | (214) 493-8561 | jitendrasrm19@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Business Analyst with 7 years of experience supporting business requirements, data analysis, business process analysis, process improvement, reporting, and stakeholder communication across financial services and healthcare environments. Experienced in gathering and documenting business requirements, analyzing current-state processes, identifying process gaps, developing functional and technical documentation, and translating business needs into user stories and acceptance criteria. Strong analytical experience using SQL, Microsoft Excel, Power BI, Tableau, Python, and R for data analysis, reporting, dashboards, and data validation. Hands-on experience with Agile delivery, JIRA, Confluence, Azure DevOps, Visio, and Lucidchart for requirements documentation, process flows, work tracking, and collaboration with technical and business teams.

CORE COMPETENCIES

Business Analysis: Business Requirements Gathering, Requirements Documentation, Business Process Analysis, Functional Requirements, User Stories, Acceptance Criteria, Process Improvement, Gap Analysis, Current-State Analysis, Requirements Analysis

Process & Documentation: Process Flows, Process Mapping, Business Documentation, Technical Specifications, Workflow Diagrams, Visio, Lucidchart, Requirements Tracking, Project Deliverables

Data Analysis & Reporting: SQL, Microsoft Excel, Power BI, Tableau, Python, R, Pandas, Data Analysis, Data Validation, Data Quality, PivotTables, VLOOKUP, Power Query, DAX, Dashboards, Reporting

Agile & Collaboration: Agile, Scrum, JIRA, Confluence, Azure DevOps, Sprint Planning, Stakeholder Communication, Stakeholder Collaboration, Cross-Functional Collaboration, Business and Technical Teams

Enterprise Systems & Integration: Salesforce, SAP, Oracle Financials, AWS, AWS Lambda, AWS S3, AWS RDS, CloudWatch, ETL, Data Mapping, Source-to-Target Mapping, System Integration

Governance & Compliance: SOX, HIPAA, GDPR, SEC, FINRA, Data Governance, Role-Based Access Control, Row-Level Security

PROFESSIONAL EXPERIENCE

Charles Schwab

Business Analyst

Aug 2025 – Present

Remote

- Gather and analyze business requirements from stakeholders and translate business needs into documented user stories, technical specifications, acceptance criteria, and actionable project deliverables in Azure DevOps.
- Analyzed current-state client onboarding business processes and mapped more than 15 process flows using Visio and Lucidchart, identifying process gaps, decision points, compliance requirements, and opportunities for process improvement.
- Documented more than 40 user stories and technical specifications in Azure DevOps to support sprint planning, requirements tracking, and collaboration between business and technical teams, contributing to a 25% faster development cycle.
- Performed data analysis and developed Power BI dashboards using DAX to analyze onboarding bottlenecks, communicate findings to stakeholders, and support data-driven process improvement decisions.
- Collaborated with business, technical, and compliance stakeholders to clarify requirements, document workflow dependencies, communicate recommendations, and support implementation of process enhancements.
- Configured AWS Lambda functions to automate client data validation and integration with Oracle Financials, reducing manual processing time by 35% and improving data accuracy.
- Transitioned workflow tracking from Excel to Google Sheets with supporting business documentation, improving remote team collaboration and reducing version conflicts by 50%.
- Implemented row-level security in Power BI reports to support role-based access, data governance, and secure stakeholder reporting.

Cigna

Business Data Analyst

Feb 2024 – Jul 2025

Remote

- Facilitated requirements gathering sessions with business and technical stakeholders to understand business needs, analyze process requirements, identify gaps, and document recommendations for process improvement.
- Developed process flows and business documentation using Lucidchart, helping stakeholders understand current-state workflows and reach faster consensus on proposed process enhancements.
- Translated stakeholder requirements into user stories and technical specifications for Salesforce integration initiatives while collaborating with business, technical, legal, and compliance teams.
- Performed data analysis and validation across integrated datasets using R and ggplot2 to identify anomalies, improve

data accuracy, and support business reporting requirements.

- Developed customized Salesforce reports with role-based access controls, providing stakeholders with secure reporting and actionable business information.
- Analyzed SAP workflow configurations and stakeholder feedback to identify process inefficiencies and recommend workflow improvements, reducing data processing time by approximately 30%.
- Supported event-driven integration between Salesforce and SAP using AWS Lambda and Python, reducing manual data handling by 40% and improving data availability.

KPMG

Data Analyst

Apr 2020 – Jun 2023

Hyderabad, India

- Performed data analysis using SQL, including Common Table Expressions and window functions, to analyze complex datasets and deliver recurring business reports with improved data extraction efficiency.
- Analyzed more than 50 million records using Python and Pandas to identify data-quality issues, trends, and inconsistencies, improving validation accuracy by 30%.
- Created 12 interactive Tableau dashboards using Tableau Prep to visualize business data and provide stakeholders with timely insights for decision-making.
- Documented ETL workflows, data mappings, and source-to-target requirements for enterprise applications, supporting consistent system integration and reducing onboarding errors by 15%.
- Maintained project and business documentation in Confluence and tracked more than 100 tasks and project deliverables in JIRA, improving cross-functional collaboration and reducing project delays by 20%.
- Collaborated with technical and business teams to investigate data-quality issues, communicate analytical findings, and support resolution of data and process-related problems.
- Managed AWS S3 data and automated retrieval workflows using Boto3, reducing manual processing time by 40% across cloud-based environments.

EY (Ernst & Young)

Junior Data Analyst

Dec 2018 – Mar 2020

Hyderabad, India

- Performed SQL-based data analysis using joins and window functions to retrieve and validate more than 10,000 financial records, supporting audit and reporting requirements with 98% accuracy.
- Analyzed multiple datasets each week using Microsoft Excel PivotTables and VLOOKUP to identify discrepancies, validate business data, and improve reporting consistency.
- Developed Power BI reports using Power Query transformations and DAX calculations to provide clear data visualizations and reporting insights to cross-functional stakeholders.
- Analyzed transactional data from Oracle Financials and SAP to identify and resolve data inconsistencies while supporting SOX compliance requirements.
- Participated in Agile sprints using JIRA to document user stories and acceptance criteria, track assigned work, and support communication across project teams.

EDUCATION

Avila University, United States

Master's in Technology Management (Business Analytics Concentration)

Jan 2025 – May 2026

CGPA: 3.7
